

Are you interested in finding out more about the Healthcare Sciences?

There are over fifty thousand healthcare scientists working in the NHS and public health services. They form a scientific backbone for the work of the NHS, leading a wide range of innovative work from world class healthcare research to improved patient outcomes.

If you are passionate about science and technology, and about helping others, a career in healthcare science could be the perfect match for you.

Healthcare scientists work in more than fifty specialisms which can be categorised into four groups:

- **Life (laboratory) sciences**
- **Physiological sciences**
- **Physical sciences (medical physics and clinical engineering)**
- **Clinical bioinformatics**

To celebrate Healthcare Science Week from 9th – 15th March, we are hosting a careers webinar where you can find out more about the different areas of healthcare science, hear from some of our specialist teams at the Norfolk and Norwich Hospital and learn about training and career opportunities.

We would welcome teaching staff and careers leads, as well as students, who are interested in finding out more.

Online via Microsoft Teams

Wednesday 11th March 2026

5pm – 6pm

If you are aged 14 or over, scan the QR code to register to attend
